

NSS ITP App - The Ultimate Admin Guide (v1.1.7)

1. Comprehensive Event Management

As an admin, the **Events** tab is your main control center. Here is exactly how to navigate it.

1.1 Creating a New Event

- **Step 1:** Open the app. At the very bottom of the screen, tap the clipboard icon labeled **Events**.
- **Step 2:** Look in the bottom right corner of the screen. You will see a floating circular button with a **+** icon. Tap it.
- **Step 3:** A "Create Event" form will open. Tap on the **Event Title** text box and type the name.
- **Step 4:** Tap the **Date & Time** fields. Select the exact start time of your event.
- **Step 5:** Enter the **Positive Hours** (e.g., type 2.0) in the text box.
- **Step 8 (Mandatory Events):** Check the box labeled "**Mandatory Event**". Type the **Negative Hours** penalty (e.g., 2.0).
- **Step 9:** Tap the blue **Submit** button at the bottom.

Cancel Create Event

1.2 Running an Event (Making it Live)

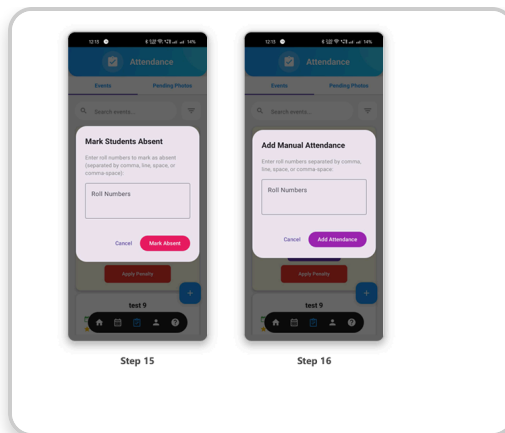

- **Step 1:** Go to the **Events** tab. You will see your newly created event as a card.
- **Step 2:** Tap the green **Start Attendance** button.
- **Step 3 (If QR Mode):** A large QR code will instantly appear on your screen. Hold your phone up!
- **Step 4:** Watch the "Live Count" number on your screen go up as students successfully scan.

1.3 Manually Adding / Deleting Attendance

If a student's phone dies or the QR scanner fails, you can manually mark them present or absent using the purple button. **This button has two hidden modes!**

- **Mode 1 (Add Attendance):** Give the purple **Add/Delete Roll No** button a **normal tap**. The "Add Manual Attendance" dialog will open. Entering roll numbers here will instantly mark them present!
- **Mode 2 (Mark Absent):** **Press and HOLD (Long Press)** the purple **Add/Delete Roll No** button for 2 seconds. The "Mark Students Absent" dialog will open. Entering roll numbers here will strictly mark them absent.

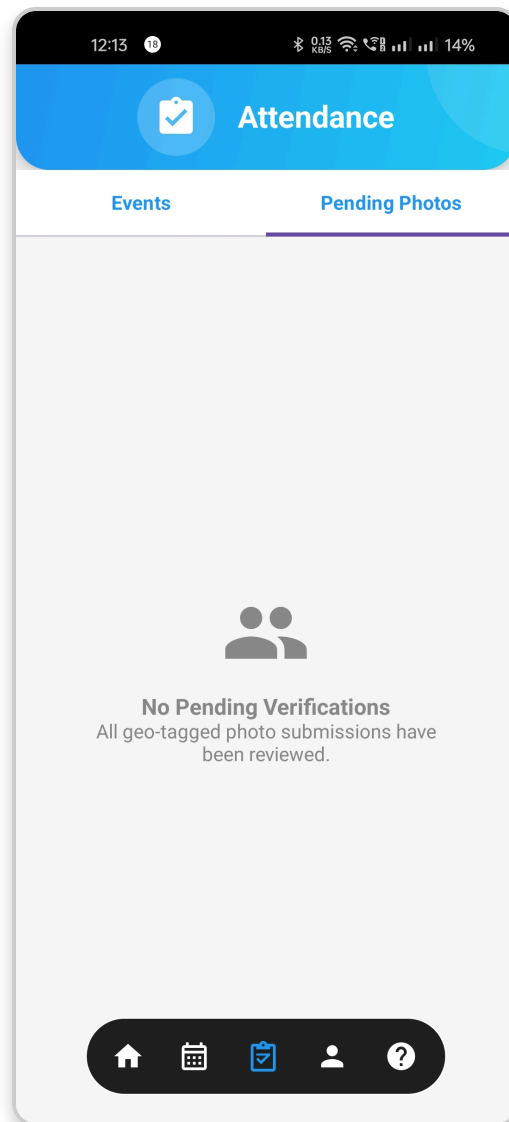

1.4 Closing an Event

- **Step 1:** When the event is over, tap the red **Close Event** button.
- **Step 2:** The event will move to the **History** tab.

1.5 Managing Pending Photos (Geo-Tagged Photo mode)

- **Step 1:** Go to the **Events** tab. At the top of the screen, tap **Pending Photos**.
- **Step 2:** Review the selfies and check the GPS location tag.
- **Step 3:** Tap **✓ Approve** or **✗ Reject**.

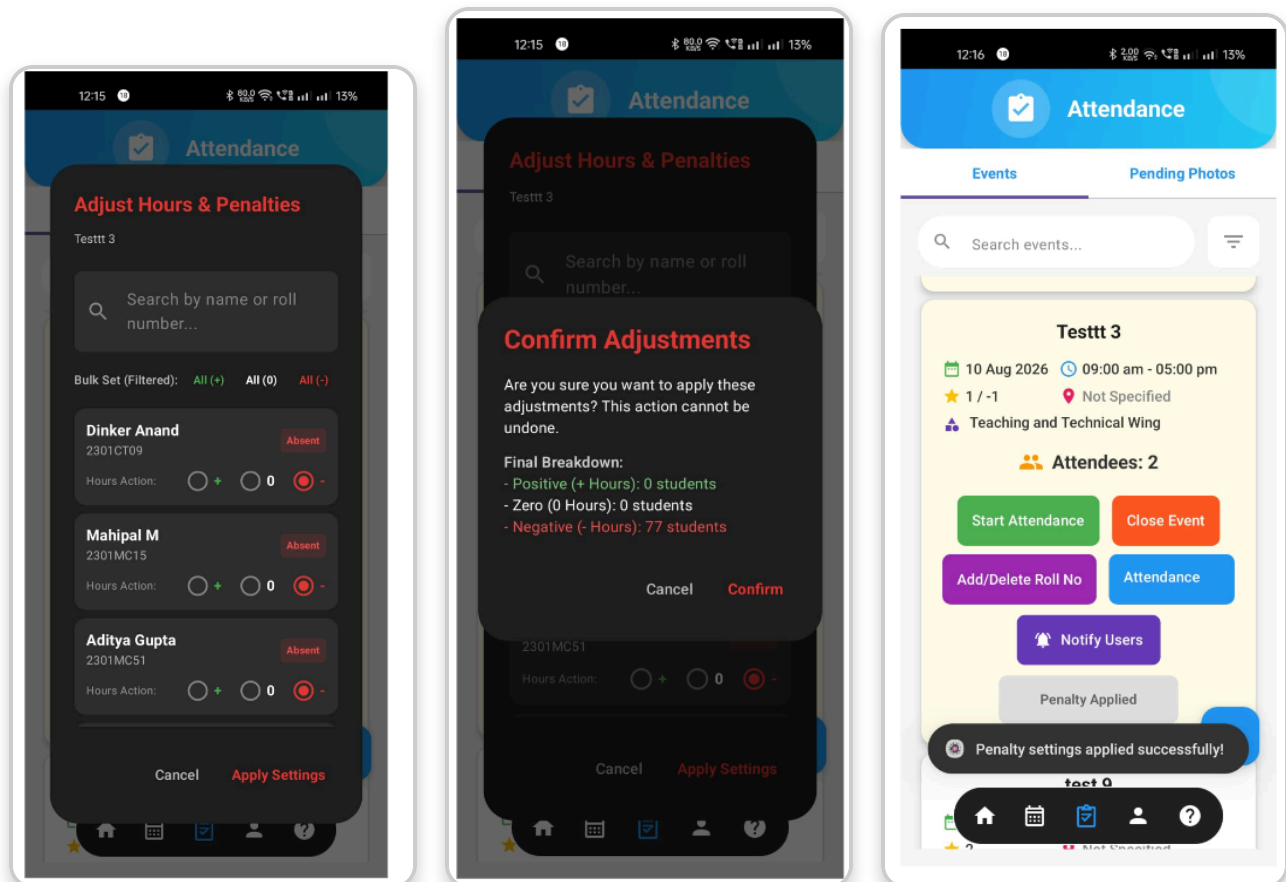

2. The Penalty System (Negative Hours)

If you made an event "Mandatory", you MUST apply penalties to the absentees after the event closes.

2.1 Applying Penalties

- **Step 1:** Tap the yellow **Apply Penalty** button on the event card.
- **Step 2:** A large popup window will open with a list of all absentees. You can filter and bulk-set hours!
- **Step 3:** Check the final breakdown before confirming. The math is fully automated.
- **Step 4:** Once applied, the event will safely display a greyed-out **Penalty Applied** button.

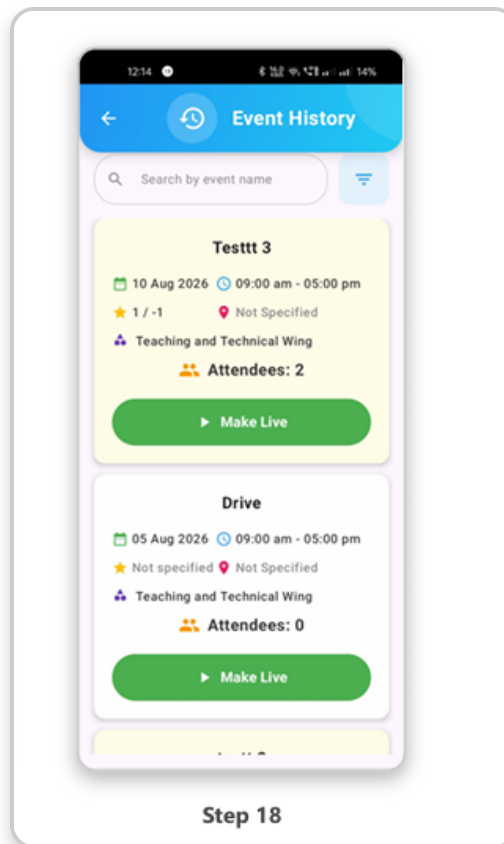

3. Fixing Mistakes (Editing & Reopening)

Mistakes happen! You can edit any event hours or even reopen a closed event.

3.1 Reopening a Closed Event (Make Live)

If you accidentally closed an event too early, you can instantly make it Live again.

- **Step 1:** Go to the **Profile** tab in the bottom right corner of the app.
- **Step 2:** Scroll down and tap on the **Event History** button.
- **Step 3:** Find your closed event in the list.
- **Step 4:** Tap the green  **Make Live** button directly on the event card. The event will instantly move back to the active Events tab!

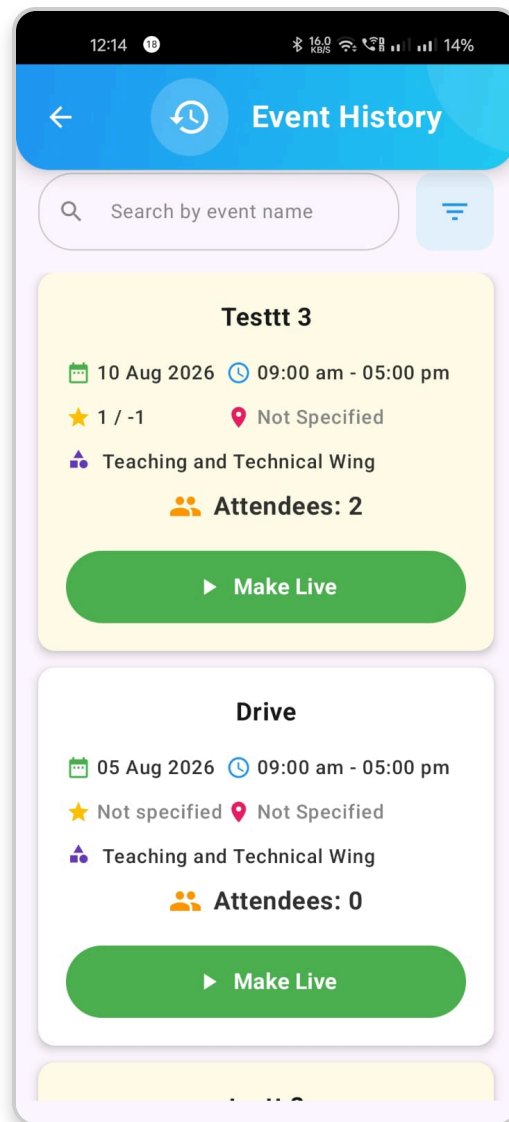

Step 18

3.2 Editing an Event

Did you accidentally type 2 hours instead of 4 hours? You can easily edit any Active event.

- **Step 1:** Navigate to the main **Events** tab (the clipboard icon). Note: You can ONLY edit events from this tab. If the event is closed, follow the steps above to "Make Live" first.
- **Step 2: Press and HOLD (Long Press)** your finger anywhere on the entire event card for 2 seconds.
- **Step 3:** This will trigger the **Edit Event** screen.
- **Step 4:** Change the **Positive Hours** text box (or any other field) to the correct value.
- **Step 5:** Tap **Save**. The cloud servers will instantly calculate the math and fix the hours for every attendee.

4. Group Chats & Communication

If you are managing the Teaching and Technical Wing, the app reads the "Subject Assignments" spreadsheet and automatically creates WhatsApp-style groups for every time slot.

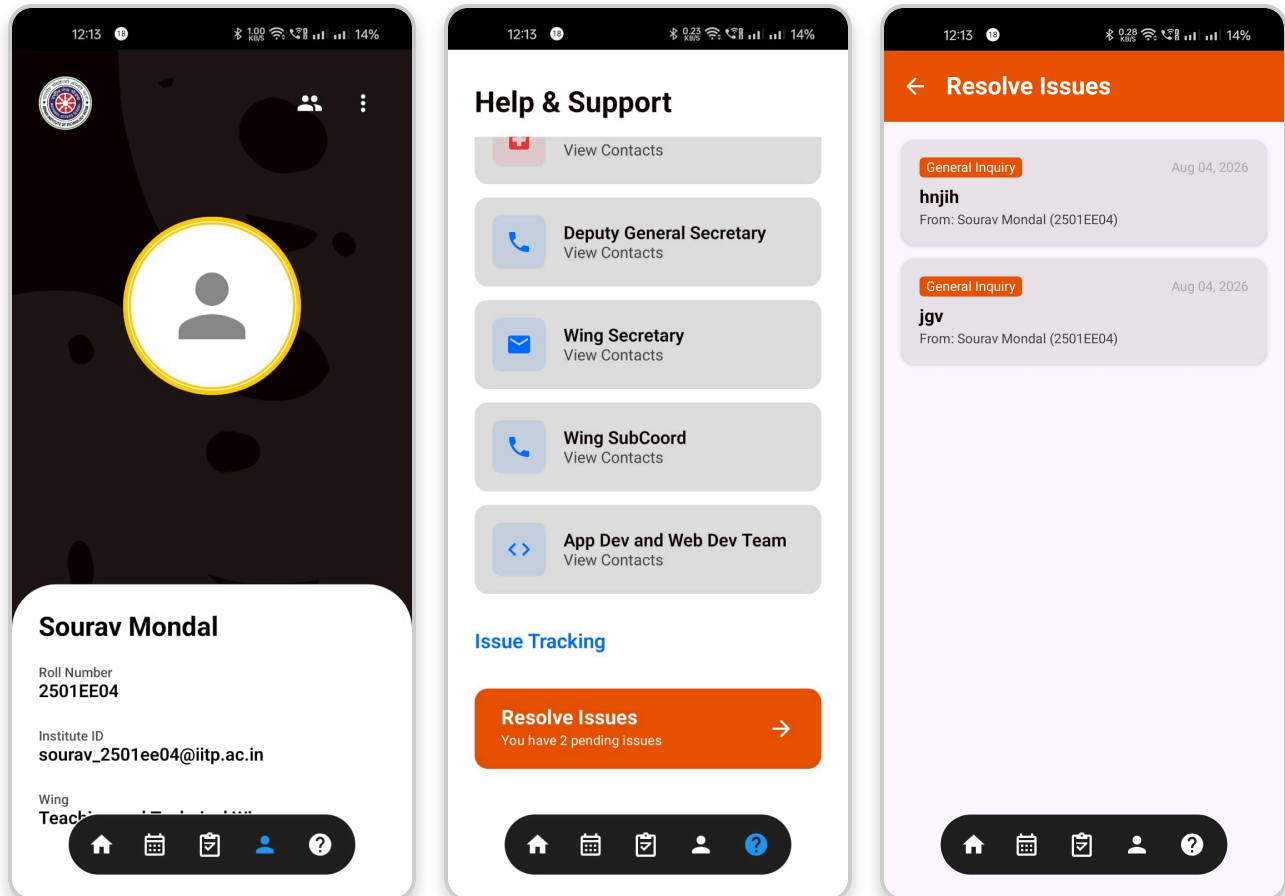

To manually create a group, tap the **Chats** tab, tap the **+** (**New Group**) icon, select students, and tap Create.

5. Resolving Student Issues (Help Portal)

Students will use the app to submit support tickets if their hours are wrong or if they want to apply for leave.

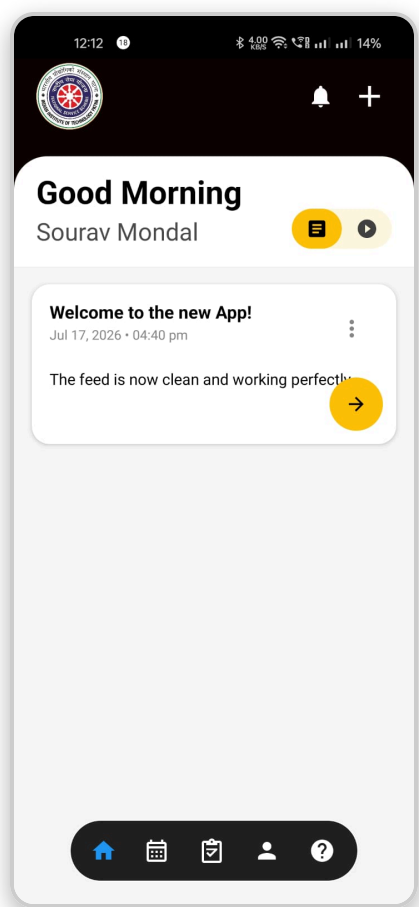

- **Step 1:** Tap the **Profile** tab, scroll down, and tap on **Help & Support**.

- **Step 2:** You will see a list of tickets in the **Admin Issue Portal**.
- **Step 3:** Tap on any ticket to read the message and tap images to view them full-screen.
- **Step 4:** Type your reply (e.g., "I have fixed your hours!"), hit send, and tap the green **Resolve** button to close the ticket.
